**DETAILED ACTION*****Drawings***

The drawings filed on February 23, 2004 are objected to because the lines, shading, etc. in Figures 49, 50, 52 and 53 are too light and the lines, shading, etc., in Figures 51 and 54 are too dark. *It is noted that the claims are drawn to the invention shown in these figures.* Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Information Disclosure Statement***

It is noted that the references cited on the information disclosure statement, filed November 12, 2003, have been considered by the examiner. *For clarity*, the patent numbers of

Art Unit: 3634

these references have been re-written by the examiner on the information disclosure statement since the typed numbers on the information disclosure statement form are too closely spaced to be clearly read.

### ***Abstract***

Applicant is reminded of the proper language and format for an abstract of the disclosure. The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites the limitation "the second base length wall" in lines 1-2 of section (f). There is insufficient antecedent basis for this limitation in the claim. It is noted that the claim sets forth "base length walls" in line 2 of section (a) and "one of the base length walls" in line 2 of section (c).

Art Unit: 3634

***Allowable Subject Matter***

Claim 1 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and thus claims 2-5 are objected to as being dependent upon a rejected base claim.
